

## Aviation Headsets

### ***LightSPEED QFR Solo C - Passive, Portable Headset***

The new QFR (Quite Flight Rules) line of headsets from LightSPEED offer the highest rated Noise Reduction Rating (NRR) of any aviation headset on the market! At 28.7 NRR, it is 3dB quieter than the next closest models and 5-7 dB better than most on the market. Whether you live in hot desert of Arizona or the cold long winters of Alaska, the soft foam ear seals feel great in all temperatures. The lightweight, low profile, and padded headband allows you to travel in complete comfort during those long cross-country trips. And, all of this great sound and comfort comes in a very lightweight package - the QFR Solo tips the scale at just less than 12 ounces!
